

NICHOLAS ARISTIANTO

Full Stack Developer

Jakarta, Indonesia | Phone: 087855233239 | Email: nicholasaristianto@gmail.com

SUMMARY

Professionally, I worked as a Laravel Developer for 1 year and 2 months at a software house specializing in ERP systems, delivering solutions for major clients such as Sampoerna and AKR Corporindo using a customized Laravel framework and PostgreSQL. Most recently, I served as a Compensation Benefit System Analyst at Erajaya Swasembada, where I focused on requirements analysis, application development, deployment, and system troubleshooting while collaborating closely with cross-functional teams.

I am passionate about web and mobile development, data analysis, and emerging AI technologies. I have a strong interest in AI-driven systems, software engineering research and development, and building scalable platforms that support intelligent applications. I am committed to continuously expanding my technical expertise and contributing to innovative engineering solutions

PROFESSIONAL EXPERIENCE

PT. Inaugurasi Pelangi Nusantara – Surabaya, Indonesia

Full Stack Developer (March 2024 – April 2025)

- Took an active role in developing ERP systems using the Laravel framework, tailored to client needs.
